

Release Notes

SQLDetective 5.1.1 (build 212)

IMPROVEMENTS

- **Online Support Desk**
 - The process of the update downloading is now indicated on the Windows taskbar.

BUGS FIXED

- **Core**
 - The error “ORA-00933: SQL command not properly ended” is no longer raised on a script execution if a DDL statement contains an empty string.
 - The error “FROM clause not found in SQL” no longer occurs on trying to execute a statement with the apostrophe in a q-notation.
 - Fixed the highlighting of a literal if the opening bracket of a q-notation is followed by a break.
 - A single-line comment is now highlighted correctly when it goes after a number.
- **Code Insight**
 - Ctrl+click now works correctly in INSERT and UPDATE statements.
